

**NONMOTORIZEDTRANSPORTATION PILOT PROGRAM  
PHASE 2 Data Collection, Level 1**

**Project Name** - Project #2 Bike Racks at Sheboygan County facilities

**Type of Project** - Procurement/Infrastructure

**Scope** - This project proposes to install high-quality, industry standard bike racks at relevant county-owned facilities in Sheboygan County.

**Location** - 15 county-owned facilities throughout Sheboygan County

**Design** - Bike racks will be installed following manufacturer standards and using the bicycle parking guidelines developed by the Association of Pedestrian and Bicycle Professionals.

**Project Cost** - Approximately \$44,165

**Project Purpose** - Providing quality bike racks in visible areas will encourage a mode shift and cycling for utilitarian trips. The project improves access between residential areas and neighborhoods, businesses and county buildings, and allows direct and appropriate access to destinations throughout the county. The bike racks are a critical component of network connectivity. The county buildings included in this proposal are in, or are adjacent to urban areas and therefore exhibit a relatively dense population.

**Estimated Level of Use Including Target Audience** - People who are traveling to and from County facilities including the 945 potential County employees.

**Period of Performance and Timeline** – Installed in Spring 2008

**New or Continuation Project** – Project is new.

**Leveraging other revenue sources** – N/A

**Will this project include Level 2 and 3 data collection** - No
