

**NONMOTORIZEDTRANSPORTATION PILOT PROGRAM
PHASE 2 Data Collection, Level 1**

Project Name - Project #37 Countywide Bike Rack Initiative

Type of Project - Infrastructure.

Scope - Areas included are commercial, schools, transit stops, churches, parks and businesses totaling roughly 700 racks.

Location - Destinations throughout the County.

Design - One to multiple bike racks per location to provide a safe, convenient place to park one's bicycle.

Project Cost - Approximately \$366,648.

Project Purpose - It is difficult for bikers to find a convenient and safe place to park their bikes throughout the county. Our study states that 25% of auto commuters said they would bike some of the time if they had amenities such as proper storage at work. Good bike parking encourages bicycle use for everyday transportation.

Estimated Level of Use Including Target Audience - There is a lack of secure bicycle parking and a noticeable gap in this infrastructure within the County. By providing quality bike racks in convenient places, more people will be inclined to ride their bike as an alternative to driving. Racks are planned for a wide array of destinations throughout the County.

Period of Performance and Timeline - Fall 2008.

New or Continuation - Project in new.

Will this include Level 2 and Level 3 data collection - Yes.
