

**NONMOTORIZEDTRANSPORTATION PILOT PROGRAM**  
**PHASE 2 Data Collection, Level 1**

**Project Name** - Project #54 City of Sheboygan Sidewalk Gap Filling

**Type of Project** - Infrastructure.

**Scope** - City-wide.

**Location** - Project runs throughout the City of Sheboygan primarily on the fringes of the city limits and urbanized township limits.

**Design** - 5' sidewalks.

**Project Cost** - Approximately \$1,004,009

**Project Purpose** - The City of Sheboygan has a very strong sidewalk policy. The surrounding towns typically do not. As the City has annexed town properties, sidewalk gaps have developed. The purpose of filling these sidewalk gaps is quite self explanatory. If you do not provide a facility for individuals to walk, they are not apt to consider it as a means to transport themselves.

**Estimated Level of Use Including Target Audience** - Many thousands of people surround the project areas. And, many of these gap areas are in commercial, industrial, and school areas.

**Period of Performance and Timeline** - Spring/Fall 2009

**New or Continuation** - Project is new.

**Leveraging Of NTPP and Other Revenue Sources** - The City of Sheboygan engineering staff put a great amount of effort into the preliminary cost estimates and design of this facility.

**This will include Level 2 and Level 3 data collection** - No.
