56. In the State of Wisconsin, 60 of 72 counties have enacted a county sales tax. The University of Wisconsin-Extension, Local Government Center, has estimated that a 0.5% (one-half of one percent) county sales tax would generate approximately \$6.2 million in 2007 in Sheboygan County. Of this \$6.2 million, out-of-county visitors would pay approximately \$1.8 million.

Sheboygan County should implement a 0.5% county sales tax to provide general property tax relief.

57. If you disagree with the previous statement, would you support enacting a 0.5% sales tax that uses the \$4.4 million generated by county residents for direct property tax relief, with the remaining \$1.8 million to be used specifically for tourism related programs and activities such as road maintenance and other infrastructure items?

- Should decrease
- Should not up taxes
- I though this reduced cost?

**Facilities**

- Asking me to increase my taxes. WHAT!!

**Additional Comments**

- This has way to many questions to answer. I hope people take time to fill this out. What good is all of this? What is going to change?
- A place for comments would be helpful to this survey. Canned answers to structured questions doesn't really tell you what people think as much as the ability to express themselves.
- Great idea. I have a Cascade address but live in Fond du Lac County (Chinatown) East side of Long Lake
- County services are most effective when they prioritize public safety, roads (infrastructure, ad bikes), and local economic development. Environmental items are best achieved by state regulations being enforced by state agencies. If you have viable local industry, you have less travel needed and thus less impacts on environment. People could bike to work!!
- Sorry this is late but I just received it on 10/1/08
- Note – Billboards along roadways are eyesore! Hwy 23 from Sheboygan to Fond du Lac should be preserved as a scenic drive – what is left

- Sorry I didn't finish --- Too long!! Give me a break!!
- My husband, Willard F. Diefenthaler, passed away May 14, 2008. I don't feel qualified to answer all the questions. Jean Diefenthaler
- Comment: These are tough times. Every entity should have to run the way families and businesses have to now days – if the money isn't there expenses have to be cut. There are 2 huge expenses that can be cut: employee salaries and pension. People who are pd by the taxpayers should not be above those people in salary & benefits. Eg: if the average starting salary for a bookkeeper in the county is 12.000/hr that should be the county/city etc starting salary. WI has a Cadillac of pension plans for the country – if that were brought down to what businesses pay our WI taxes could go down or more could go to help schools thus reducing local taxes. I challenge all our local gov'ts to look into and address the above two issues.
- Didn't we just fill one of these out in the last two years.
- Good luck on getting a high rate of return – survey was very lengthy - & somewhat repetitive. Keep it brief.
- This survey is too long! When our school district sends out surveys, we try to keep the survey to 3-4 pages, otherwise folks won't complete it. Mary H Adleman
- Easy answer: Small Gov't = small taxes = development
- Note: 1) Cut supervisors wages 2) 3% per year for all county workers – That's better than I get being retired
- This survey is far too difficult to fill out with any intelligent answers – I know nothing of land use – run off etc – what kind of employment is even out there to attract. This requires some basic knowledge of a lot of things most people have no grasp of. How much time and money was wasted on this survey
- We would like to expand the family – owned small business, but find it difficult to do with the high taxes we pay for the business. We do not feel we can develop our business more in a high taxes for business climate.
- No more Walmarts – They kill the small businessman they pay low wages, and the employee gets no benefits!! They import Sh\_t from China, its worthless!!!
- FYI – Survey was way too long. I think you might have better success with a shorter survey – consider sending 2 instead of one?
- My residence is now on the Fond du Lac side of the county line – primarily because of lack of co-operation on the part of Town of Greenbush officials in regard to location of our new home and sale of our old farmstead to the DOT
- Slips (notices) like the pink one above (enclosed) disgust me they only encourage “those living among us” not to learn English. If someone wants input into the government they're living under and reaping benefits from, the very least they should do is learn the language of that country. If I were living, for example, in Mexico, I seriously doubt if they would send me a government document in English!
- The above questions are incoherent to this survey regarding growth & services to county
- I believe that the quality of living in Sheboygan County is good. I feel there is wasteful spending by government in the “social service” area. Welfare, housing, free food. Yes I know the people that need it should get it, but I know of too many lazy people that refuse to work and expect hand outs from government, or are taking housing subsidy's for new homes – than moving in with someone else and renting out their “new homes” for rent. To me this isn't right!
